## ALMANACS — ALMANACS — ALMANACS

[This Catalogue is in Chronological Order]

### Colonial-era American Almanac

**Mein and Fleeming's register for New-England and Nova Scotia.** With all the British lists; and an almanack for 1768, being bissextile or leap year. Calculated for the meridian of Boston. Illustrated with a type of the eclipse of the sun of January 19th. Boston: Printed by Mein and Fleeming, and to be sold by John Mein at the London Book-Store, north-side of King-Street, [1767]. 12mo. 92, [4] pp.; illus.

**\$850.00**

First issue of this short-lived colonial-era almanac. According to the cataloguers at the AAS: "The calculations and wording of the eclipse predictions (p. 3 and 12), the accompanying illustration, and the calculations on the calendar pages, are identical with those in Bickerstaff's Boston almanack for 1768 (Boston: Mein & Fleeming) except that for some months those in the two 'High water' columns are transposed. Bickerstaff's was apparently calculated by Benjamin West. Cf. Nichols, C.F. 'Notes on the almanacs of Massachusetts,' Proceedings of the American Antiquarian Society, n.s. v. 22 (1912): 34-35; and the Dictionary of American Biography."

The last leaf, filled on both sides, lists a "Grand Assortment" of books available from "J O H N M E I N"; these are of a variety of sorts, but the one that gets an all-caps headline is a new edition of Fordyce's Sermons for Young Women!

Evans 10687; Drake 3164; ESTC w22665. Sewn in original marbled wrappers. Usual foxing and light age-toning of almanacs of this era and region. Some dog-earing and "thumbing"; small piece of wrapper missing from lower spine. Else very good. (18214)

**West, Benjamin.** North-American calendar. Or the Rhode-Island almanack, for the year of our Lord 1783. Providence: Bennett Wheeler, [1782]. 8vo. [30] pp. (lacking final f.).

**\$125.00**

Includes the text of the treaty of alliance with France, signed at Paris in 1778. One of two issues, the present example is described as being printed by Bennett Wheeler and sold at his office, without mention of the Henry Barber listed on the other issue.

Evans 17796; ESTC W22733. Original sewing, loosening, now in a Mylar folder. Browned, edges ragged. Lacking final leaf. (6911)

**The American calendar, or United States register, for the year 1794.** London: J. Debrett, 1794. 12mo (16 cm, 6.25"). 187, [1 (blank)] pp.

**\$650.00**

Uncommon British reprint of an American work originally printed in Philadelphia. Although no calendrical information is present, much other material commonly found in almanacs is: lists of government officials by state, population statistics (categorized by free white males and females, slaves, and "other persons"), and duties payable on assorted goods.

ESTC T105844. Period-style quarter calf with marbled paper-covered sides, spine with gilt-stamped leather title-label and gilt-ruled raised bands. Title-page and a few others stamped by a now-defunct institution. Some offsetting to margins of first and final leaves, pages otherwise clean. A nice little Anglo-Americanum, very evocative of its era. (12887)

1848 edition of Dickinson's almanac series. The volume opens with an oversized, folding map of the city, with a note that the map is a specimen of a new type of plate printing. An advertisement on the back free endpaper mentions that Dickinson has "sold out his extensive Printing Office . . .
